ALZU PIG FEEDS

ALZU pig feeds are formulated on sound scientific principles including nutrient designs for the correct protein/amino acid and energy balance. The feeds are manufactured for the optimum production and growth during the various stages of the pig's life. It is not recommended to add any additional feeds as it will cause an unbalanced diet. A vitamin and mineral premix pack is added as a standard to all ALZU's pig feeds.

FEEDING OF PIGLETS

(Birth mass 1.4 - 1.5kg)

During the first 3 weeks the piglet gets most of its nutrients from the sow. It is recommended to inject Fe (Iron) between 3-7 days after birth. From 10 days start giving small quantities of ASA1 to the piglets. The feed must always be fresh to stimulate intake. Wean on 28 days. The target weaning mass is: 6.75 - 8kg

ALZU PIG WEANER VS180 Reg.No:V12067 Act 36 of 1947

Keep feeding ASA 1. The total intake of ASA 1 /piglet should be 3kg. Follow up with ASA2. The intake on the ASA2 should be 4kg/piglet.

Start going onto ALZU PIG WEANER VS180 gradually and feed till 70 -84 days (25-27kg). The average intake of feed over this period should be 1.5kg and the weight gain should be 0.55 g/day/pig.

ALZU PIG GROWER VG160 Reg. No:V12067 Act 36 of 1947

Feed ALZU Grower VG160 from 10-12 weeks till marketing ad lib. The average intake from 70-112 days should be 2 kg/pig/day and weight gain 900 g/pig/day. From 113-168 days the intake increase to 2.5 kg/pig/day and the weight gain is 1.2 kg/pig/day

ALZU SOW & BOAR VB150 Reg.No: V12066 Act 36 of 1947

ALZU Sow and Boar are given to the dry sow from serving till about two weeks before farrowing. Feed intake should be 2,2 - 2,5 kg/sow/day till 2 weeks before farrowing.

The young boar is fed VB150 from 2 months before putting him to the sows. The accepted growth ratio of the boar is 150 g/day with a target mass of 175kg. The working boar should get 2,2 - 2,9kg of VB150 per day.

ALZU LACTATING MASH VL160 Reg.No:V12068 Act 36 of 1947

Start giving ALZU Lactating two weeks before farrowing at 3 kg/sow/day. One week before farrowing increase to 4kg/sow/day. After farrowing feed the sow 2,5 kg plus 500g per piglet in the utter from weaning till feeding 4kg/sow/day.

ALZU PIG CONCENTRATE VKKON Reg.No:V12106 Act 36 of 1947

ALZU Pig Concentrate is well balanced and a vitamin and mineral premix pack is added. The mixing recommendations are:

	Wean ration	Grow ration	Sow & Boar ration
VKKON	500 kg	400 kg	300 kg
Yellow Maize	500 kg	600 kg	400 kg
Wheaten bran	-	-	300 kg
TOTAL	1000 kg	1000 kg	1000 kg
Feeding guide line	Feed ad lib Wean till 25 kg	Feed ad lib From 25 kg till marketing	2,2 - 2,9/pig/day

ALZU GUIDELINES ON WEIGHT AND INTAKES

Age Days	Target weight	Good	Poor	Intake kg/pig	Growth g/day
56	21	17	16	09.	690
63	28	23	21	1.1	730
70	34	29	27	1.2	765
77	41	35	33	1.5	800
84	47	41	38	1.5	835
91	54	46	44	1.7	870
98	61	52	49	1.9	900
105	67	58	55	2.1	930
112	74	64	60	2.2	955
119	81	70	66	2.4	980
126	88	76	72	2.6	1005
133	94	82	77	2.8	1030
140	101	88	83	3.1	1050
147	108	95	89	3.3	1070
154	115	101	95	3.5	1080
161	122	107	100	3.7	1090

Management, temperature fluctuations, wet pens, draughts, breed, diseases, composite of diet and feeding at different stages of growth, etc. are all factors that can influence your piggery enterprise.

ALZU SLAUGHTER CLASSES OF PIGS

		Slaughter
Porker	35kg - 55kg	65 - 71 %
Cutter	56kg - 65kg	71 - 76 %
Baconer	66kg - 80kg	71 - 76 %
Heavy	81kg - 99kg	81 - 76 %
Wors	100kg +	76 - 78 %
